

Recommended Products

Whilst there is no requirement to use approved products due to the versatility of the Flexseal® finish, JK is committed to providing the customer with an effortless, high quality experience. As such we have asked suppliers to test the JK Flexseal® product, and provide a list of recommended products that they are happy to be used on top of JK Flexseal®.

Mapei

Mapei has tested the JK Flexseal® product at their Halesowen paste plant and produced a list of recommended products. This is test TRF-022-2023 and the method of testing is based on the principles of BS EN 12004-2:2017

The below table has been provided by Mapei UK as their recommended range of products for use with JK Flexseal®, if your particular use case is not covered below, Mapei's technical team can be contacted directly for advice on your particular use case.
